### Forecast for Tuesday 25 Aug 2020

**Weather:** Heavy rain and gales will arrive through the early hours of Tuesday and spread across the park before dawn. Rain will be at its heaviest and most persistent through the morning with southern facing hills likely to see the heaviest rain. As rain eases early afternoon, a few bright or sunny intervals may develop, but heavy and perhaps thundery showers will push in, before persistent rain and drizzle returns through the afternoon and evening, with western facing hills likely to see the heaviest rain by then. Southerly winds will be strong through the morning, widely reaching gale strength, especially across summits. Winds will gradually change direction to blow from the southwest through the afternoon and then from the northwest into the evening. Persistent rain will make for slippery paths and channels of water will develop through the day.

**Chance of cloud free mountain/hill tops above 600m:** 0-10% for most of the day, but briefly improving to 60% between 12:00-15:00.

**Visibility:** Often moderate or poor in rain and very poor in fog (low cloud). Occasionally good, mainly through early afternoon.

**Meteorologist's View**

Wind gusts likely to be higher on summits, exceeding 50mph at times.

**Recent rainfall:** measured at Cat & Fiddle: altitude 511m

| Recorded at              | Last 24 hours: | Last 48 hours: | Last 72 hours: |
|--------------------------|----------------|----------------|----------------|
| 02:00 on Tue 25 Aug 2020 | 1.8mm          | 7.6mm          | 14.6mm         |

**Forecast for Wednesday 26 Aug 2020**

**Weather:** Remaining wet and windy through the first part of Wednesday with further periods of heavy rain and gales for a time. This will then clear away to give a fine afternoon with much lighter winds, leading into a chilly but clear start to the night.

**Maximum wind:** Northwesterly 35-40mph, gusting 45-50mph but quickly easing by 12:00 to northwesterly 10-15mph, gusting 20mph.

**Chance of cloud free mountain/hill tops above 600m:** 0-10% until 10:00-13:00 (eastern areas cloudiest for longest) then improving to 100% thereafter.

**Visibility:** Often moderate or poor in rain and very poor in fog (low cloud). Becoming excellent through the afternoon with some clarity on far reaching ridges.

**Temperature:** **Valleys:** Plus 13 Celsius, rising to Plus 16 Celsius.

**At 600m:** Plus 10 Celsius.

**Freezing level:** Above summits.
